	Triple Span	

#### NOTES:

- Top values based on allowable stress.  
Bottom values based on allowable deflection of L/180.
  - "-" denotes that the allowable load is limited by the allowable flexural bending stress.
  - Steel conforms to ASTM A653 (Galvanized) or ASTM A792 (ZINCALUME®) structural steel.
  - Tabulated values are for positive (Inward) loading only.
  - Values are based on the American Iron and Steel Institute (AISI) "Cold Formed Steel Design Manual" (2007 Edition).
- Specifications subject to change without notice.

**Oil Canning** : All flat metal surfaces can display waviness commonly referred to as "oil canning". "Oil canning" is an inherent characteristic of steel products, not a defect, and therefore is not a cause for panel rejection.
