LOADING TABLE LEGEND
 f - Load limited by flexural bending stress
 L - Span (Inches)
 L/180 - Load limited by a deflection of 1/180 of the span
 w - Distributed load

NOTES:

- Top values based on allowable stress. Bottom values based on allowable deflection of L/180.
- “-” denotes that the allowable load is limited by the allowable flexural bending stress.
- Steel conforms to ASTM A653 (Galvanized) or ASTM A792 (ZINCALUME[®]) structural steel.
- Tabulated values are for positive (Inward) loading only.
- Values are based on the American Iron and Steel Institute (AISI) “Cold Formed Steel Design Manual” (2007 Edition). Specifications subject to change without notice.

Oil Canning : All flat metal surfaces can display waviness commonly referred to as “oil canning”. “Oil canning” is an inherent characteristic of steel products, not a defect, and therefore is not a cause for panel rejection.
