

PROJECT SPOTLIGHT:

FIRESTATION 63

TACOMA, WA

The expansive Central Pierce Fire and Rescue Station is designed to house one fire engine and one paramedic unit including crew living and support areas. Metal panels were selected and designed based on sustainability, durability and integration into a broader mill concept. AEP Span's Nu-Wave Corrugated metal wall panel in Burnt Rust was selected to add a warm, contrasting hue to other metal wall products while also integrating with wood accents.

Architect: RiceFregusMiller and TCA Architecture Planning

Customer: Interstate Sheet Metal
